- Payten is a powerful and functional cow that has done great things for our herd. Her power is something to appreciate, along with her sweet and gentle demeanor, she is sure to be an easy keeper. Payten saw lots of success during her time in the show ring, and she continues that success with her offspring. Bred AI on Dec. 9, 2022, to QHF Captain America 35F and has been confirmed bred.

- A very nice complete functional heifer that is smooth in her lines, soggy middled, ultra sound from the ground up and clean fronted. This heifer comes from a long line of successful show ring pedigree going back to the original Cotton's Blessing(P43319387). Mixed with Ribeye 88X (43091446) this heifer offers both production and show ring potential. Bred AI to calving ease VCR 711E Convoy 41H (44195422) due to the middle of November. We are excited to offer this heifer to you and look forward to following her career.

- A very functional heifer raised out of our son's fist show heifer. This female is stout boned, functional, production oriented with fertility as her foundation. She is a heifer that will easily go to the field and successfully throw progeny each year. This cow family was purchased for the fertility factor and we have no doubt that this female will continue on with those characteristics. Bred AI to the calving ease VCR 711E Convoy 41H (44195422) due to the middle of November. We are excited to have this is our second offering of the sale and look forward to following her career.

- Dark Red, pigmented and clean fronted. This young lady is going to make a cow that you will want to keep out front. She goes back to Hoffman genetics on the bottom and out of a 2296 son that we use heavily in our operation. Mia is out of a first-time heifer and the udder quality was impeccable. If you are looking for your next milking machine, I'm confident she will get the job done. Sells halter broke.

- This ET heifer sired by Tebow is out of our oldest, most consistent donor females. The dam of this heifer is one that is just flat hard to find a hole in — moderate framed, sound structured, easy fleshing and attractive, and this late February heifer calf is made just like her.
- She will not be the largest framed cow in the field, but if you are looking for good footed, maternal, easy keeping females that will raise a quality calf every year — this is one to look at. Combine that with a very balanced EPD profile, and she is one that will work in a lot of different operations.
- Sells open and ready to breed to the bull of your choice.

- This goggle eyed, conservatively marked January heifer is one that you can't help but find in the field. Moderate in her frame, she is super attractive in the way she is put together in her hip and the set of her front and hind leg, while still offering plenty of depth of body and length through her front end. Looking for a low input, high quality female that offers a balanced set of EPDs and is easy to look at? Here she is!
- Sells open and ready to breed to the bull of your choice.

Consigned by Black Locust Livestock, Michael and Rebecca Webert

- With two boys now showing, we hesitated to sell this late October heifer because we think she has tons of potential. Out of a "never miss" cow who consistently raises one of our top calves, this heifer is sired by our senior herd sire, Historian, who is a Historic son. This is now his second calf crop on the ground, and we can without a doubt say that he consistently produces calves that are sound, stand on plenty of foot and bone, have plenty of growth and are still attractive as well – and this heifer is absolutely all of those things. Take her home and show her, or simply develop her to be a front pasture cow. Either way this heifer's combination of function, style and EPDs should make a powerful female! She will sell green broke.
- Sells open.

Consigned by Black Locust Livestock, Michael and Rebecca Webert

Black Locust *Livestock*

NJW 79Z 81E Historian 334G ET

We are excited about this senior herd sire - Historian's first calf crops are proving that he has the ability to stamp his offspring with plenty of bone, power, and performance when used on many different dams. Several calves sell in this sale!

Producing purebred heifers, cows, and embryos that will work in the show ring, and the pasture.

We also offer commercial black baldie females to fit many different operations.

- This July born heifer is one of our last calves we had by Beef 4007 who worked here for many years breeding heifers. The Boyd Beef daughters have made extremely great cows for us and we couldn't have asked any more from them. We believe this heifer will go on to be a front pasture cow for her new owner.

- A growthy, attractive, pigmented, halter-broken daughter of S08 and Genesis 16 with the sire's proclivity of adding chrome to a calf's back. K01 is framey and will be a cow that milks exceptionally well. The astute breeder might breed or flush K01 to Validated and hit the jackpot. K01 will add frame to Validated progeny, and Validated's red will remove excess chrome. Think on it … this could be a one step move to produce breed leaders. K01 sells open.

- 37HK is a dark red, Cuda daughter that should make a fantastic brood cow. Her dam is a Homeland daughter who is an up-and-comer for us. Should be a productive brood cow with great potential. She is above average on 18 of the 20 indexes. Great opportunity. Sells open and ready to breed to the bull of your choice.

The Power of Genomically Enhanced EPDs

The American Hereford Association (AHA) has embraced the use of genomics into their genetic evaluation by launching a first of its kind single step analysis that utilizes the marker effects of specific traits. Likewise, AHA is directly estimating accuracy values rather than approximating. The direct estimation of accuracy results in a more conservative value but a more accurate value than previous methodologies. The AHA is producing the most reliable genetic evaluation that is supported by Whole Herd TPR™ and genomics, which will give prospective buyers added confidence in purchasing young and unproven animals.

Buying animals that have a genomic profile incorporated into their Expected Progeny Difference (EPD) offers many advantages that allow for quicker breed and herd improvement. Below is a table showing the average increase in accuracy when buying a young animal with a Genomic Enhanced EPD (GE-EPD) versus an animal without a GE-EPD. Similarly, an effective progeny number increase is listed by trait that shows how many progeny equate to a genomic enhancement of a young animal (e.g. yearling). That's right, buying a young animal that has been genotyped is like having 2-17 progeny, depending on the trait. The proof gained on young, non-parent animals, through a genomic enhancement is valuable and greatly mitigates the risk and allows for more directed selection.

Each animal tested is recognized with the AHA GE-EPD logo.

AHA Trait	Accuracy Improvement	Effective Progeny Number Increase*
Calving Ease	0.09	17
Birth Weight	0.12	8
Weaning Weight	0.14	12
Yearling Weight	0.16	9
Scrotal Circumference	0.17	6
Mature Cow Weight	0.12	4
Udder Suspension	0.17	7
Teat Size	0.17	7
Carcass Weight	0.11	3
Fat	0.08	2
Rib-Eye Area	0.07	2
Marbling	0.10	3

* Effective Progeny Number Increase (EPNI)- EPNI is the difference gained for genotyped animals versus non-genotyped animals.

Terms and Conditions

1. **Identification:** It shall be the obligation of the seller to determine that each animal sold carries a legible tattoo.
2. **Bidding:** Each animal will be sold to the highest bidder. The auctioneer will settle any dispute as to bidding. His decision shall be final.
3. **Terms:** All cattle must be paid for during or immediately after the sale and may not be moved before settlement has been made with the clerk, unless prior arrangements have been made with a member of the sale committee. Each animal will be at the purchaser's risk as soon as sold.
4. **Corrections:** Corrections or additions of any information in the sale catalog will be announced from the auction block and such announcements will take precedence over any printed material.
5. **Mail or Phone Bids:** May be sent to the auctioneer, sale day phone 540-333-1019 or any of the sale staff.
6. **Registration Certificates:** Certificates will be transferred to the buyer. It is the responsibility of the buyer to give the correct name and address for making transfers. Calves born after the sale are to be registered by the purchaser. AI certificates will not be given on unborn calves unless otherwise stated by the consignor or if the consignor is the owner of co-owner of the AI bull.
7. **Health:** All cattle selling will have health certificates for interstate shipment.
8. **Guarantee:** The laws of the State of Virginia shall govern the validity of this sale, the construction of its terms, the interpretation of the rights, duties and obligations of the buyers and sellers, the enforcement of its terms, the remedies upon breach and all other matters relating to this sale. The exclusive venue and forum for any legal disputes between the parties shall be either in the Federal District Court for the eastern section of Virginia or in a state court of competent jurisdictional defenses that each may have to the institution of such an action in such courts.
9. **Responsibility:** All persons attending the sale do so at their own risk. Neither the Virginia Hereford Association nor the Rockingham County Fairgrounds will in any way whatsoever assume liability, legal or otherwise, for any accidents or injuries that may occur.
