Requirements for carcass collection

1. Must have complete pedigree information on progeny (both parents registered)
2. Must be part of whole herd TPR with at least a weaning weight collected.
3. Only Steers and Heifers permitted, no bulls

Contemporary Group (CG) Guidelines

1. Same Weaning Contemporary Group and same sex
2. Same management post weaning
3. Same feedlot pen, same feedlot placement date
4. Same rations, implants, health protocols and feedlots should present individual health records on animals that have been treated for sickness.
5. Same Harvest date at same packing plant and same carcass collection date by one individual or by validated instrument grading.
6. Cattle must be harvested between 400-560 days of age.

**Marbling Scores:**

Marbling scores may be presented to you in several ways. It is important to use the following codes in the marbling score column on the form above..

Example: Your data from the plant may list the marbling score as Small50, SM50 or 450. All are equivalent scores. You would record it in the marbling score column above as a 45.

- |                  |                                |
|------------------|--------------------------------|
| Traces (TR) = 20 | Moderate (MD) = 60             |
| Slight (SL) = 30 | Slightly Abundant (SLAB) = 70  |
| Small (SM) = 40  | Moderately Abundant (MAB) = 80 |
| Modest (MT) = 50 | Abundant (AB) = 90             |

I have read the guidelines listed above and the data submitted here adheres to these requirements. \_\_\_\_\_
