Dear Friends and Fellow Breeders,

Welcome to the 6th production sale of Heartland Genetic Blend. We again this year feel like we have brought you an outstanding offering to this sale. Some of this group of Hereford and Angus cattle are sired by some of the top AI sires in their respective breeds. In this offering, we have a nice group of breeding age bulls, fall cow/calf pairs, some spring cow/calf splits and a nice group of bred heifers and some heifer calf show prospects.

We are very grateful for the help and support of our families and friends, without them we would not be able to put on this sale.

We hope you can be with us on October 14th, but if you’re not able to attend you will be able to view this sale on LiveAuctions or you can contact one of our sale representatives or members of the Heartland Genetic group.

Stop by on Friday evening and view the cattle and have a bowl of chili with us. As we have always said, it’s not only the cattle but the people that are involved that make it so exciting to be a part of the these two breeds.

Hope you see you all on the 14th!

Here’s proof positive that a Revolution 4R daughter bred to Sensation 028X is a formula for success! Moderately framed and dark red with great markings, Princess 4D is sweet lined with great disposition and maternal genetics to boot!

Bred AI May 19, 2017, to FTF Porterhouse 455B, then pasture exposed June 2 to Aug. 1, 2017, to LPH 028X Dexter 123D. Safe to AI.

This Prospector 145Y daughter is a real gem. Just look at those lines and that beautiful udder. Her dam continues to prove herself year after year.

Pasture exposed to our Sensation son, LPH 028X Ringo Star 5C.

Just look at this Sensation 028X daughter! Moderately framed, dark red with a near perfect udder, she is solid structured and a real looker! She has the makings of a great momma!

Bred AI April 18, 2017, to FTF Porterhouse 455B, then pasture exposed May 1 to Aug. 1, 2017, to LPH 028X Dexter 123D. Safe to AI.
**Lot 15 — Lories Missy R210**

Lories Missy R210 is a daughter of DeLHawk Ammo 1011ET. Her mother LJR Lorie 350T is sired by PW Victor Boomer P606. R210 is a thick, moderate framed cow.

- AI bred to Trust 167Y. Due in September.

**Lot 16 — JS Abbie 34A 607D**

JS Abbie 34A 607D is an early September heifer out of C&L CT Federal 485T 6Y. Her mother is a dark red, moderate framed cow and is a daughter of About Time 743. 607D has the qualities to make a good, productive cow.

- Stout and packed full of red meat, google-eyed and good numbers. We used him on our spring heifers and he really held his own. This bull is a full brother to our top selling female last year, going to Larry Day. Also, a full brother to Phillip’s senior yearling show heifer this year.
• A natural calf out of our donor cow 49T. She will make a really good cow.

• Bred AI May 1, 2017, to Innisfail WHR X651/723 4013 ET, then pasture exposed May 15 to Aug. 1, 2017, to MPH 73Z Times a Wastin 50C.

• An 81S daughter that I just love; hard to part with one like this. My kind of heifer, 81S stamps them with udders that are great and super easy keeping.

• Bred AI May 1, 2017, to Innisfail WHR X651/723 4013 ET, then pasture exposed May 15 to Aug. 1, 2017, to MPH 73Z Times a Wastin 50C.

• Another really good bred heifer, her mother is a really nice uddered cow that always brings in one of the biggest calves.

• Bred AI May 1, 2017, to Innisfail WHR X651/723 4013 ET, then pasture exposed May 15 to Aug. 1, 2017, to MPH 73Z Times a Wastin 50C.

• A very attractive, powerful female by CPH 4037 Goodnight 23Z and our 43X cow. She would have done well in a showring. Mother is a powerhouse cow as well as beautifully uddered.

• Bred Al May 1, 2017, to Innisfail WHR X651/723 4013 ET, then pasture exposed May 15 to Aug. 1, 2017, to MPH 73Z Times a Wastin 50C.

• A Journagan bred heifer that does a good job for us, moderate and easy keeping.

• Bred Al Dec. 6, 2016, to Churchill Sure Bet 4195B ET, then pasture exposed Dec. 21, 2016 to March 18, 2017, to MPH S8 Legacy 501 20Y.

- A great pair of herd sire prospects from the flush of SAV Renown to the Triple V donor “Keela.” Moderate in their calving ease, D154 and D157 exemplify the performance and phenotype many Renown’s are complimented for.
- Among current non-parent sires: both bulls rank in the top 25% of the breed for YW and MARB, and top 20% $G.
- D154 ranks in the top 15% for DOC, 30% REA and 10% $YG. Combining the SAV “May” cow family with “Keela” will only strengthen the maternal characteristics in any cow herd. See the consistent quality in “Keela” progeny in lots 137A and 137B.

American Angus Association

**$Value Indexes**

$Values are multi-trait selection indexes expressed in dollars per head, to assist commercial beef producers by adding simplicity to genetic selection decisions. A $Value has meaning only when used in comparison to the $Value of another animal. For example, just as with EPDs, variation in $Values between animals indicates average expected differences in the relative value of progeny if random mating is assumed and the calves are exposed to the same environment.

**How do I use them?**

$Values should be used to complement the criteria that producers already use when selecting bulls.

The $Values are not designed to be driven by a single trait, as an index is multi-trait by design. These selection tools are the result of the application of industry-relevant market values to Angus genetics for preweaning, feedlot, and carcass merit.

The SW, $F, $G and $B values on individual animals and the Sire Evaluation Report may be viewed at www.angus.org.

**Weaned Calf Value ($W):** an index expressed in dollars per head, is the expected average difference in future progeny performance for preweaning merit. SW includes both revenue and cost adjustments associated with differences in birth weight, weaning direct growth, maternal milk, and mature cow size.

**Feedlot Value ($F):** an index expressed in dollars per head, is the expected average difference in future progeny performance for postweaning performance compared to progeny of other sires.

**Grid Value ($G):** an index expressed in dollars per head, is the expected average difference in future progeny performance for carcass grid merit compared to progeny of other sires.

**Beef Value ($B):** an index expressed in dollars per head, is the expected average difference in future progeny performance for postweaning and carcass value compared to progeny of other sires. The $B value combines the contributions of $F and $G.
