ANNOUNCING:

BULL SALE

Sunday,
March 22, 2020

1 p.m. at the Farm

Selling 25 Bulls and 34 Heifers
Greeting everyone,

Welcome to the K7 Herefords 12th Plus One Annual Production Sale. We have strived to be a producer that breeds our cattle in a form that will work for the cattle industry and your programs. We put emphases on keeping our birth weights lower and high growth rates that exceeds the breed average. Our cattle are bred to be moderate framed and moderate weight. With a goal of being above breed average in ribeye and marbling. This year we sorted very heavily for quality and structural soundness and feet.

The 2019 calves had to endure a few hurdles. In January, just as calving started full force the Polar Vortex hit! Yes, we have a few with short ears and might have lost a tip of tail or two, yet we made it through. Later, the weather improved and someone said, “send in the KNATTS!” really want to thank them—NOT. Then the floods came and it got really soggy, yet this also passed. Come June and July we dried out and the drought was here. As the weather changed again, we weaned the calves, and these calves really started to take off. We feel they are the most uniform set of calves we have ever produced.

We are very proud to say that we are offering all the K7 2019 heifer calf crop. We believe in selling our own product, we don’t believe it’s necessary to be buying a lot of cattle to produce replacements. Yes, we will buy a few select females along the way, but our goal is to be the kind of producers that have animals that will go out and work, animals that have good feet and moderate frame. Cattle that can go out and survive on grass, and the type of cows that don’t need special feeding to be able to produce. These also are many of the same goals of our longtime K7 bulls and heifer customers, and longtime very close friends, Veessers’ Triple E Farm, Powers, Michigan (Upper Peninsula). We welcome them as consignors again. Most of their genetics have K7 influence in their pedigrees. Mark and Veesser’s Triple E have a wonderful offering again this year of a bull and three heifers. BWF has consigned some heifers to add to your choices of females, and we are pleased to welcome them to the selection of cattle this year. Jeff Heslep & Blaine Waire family from Arkansas.

Again, this winter the fall bulls are maintained on eight pounds of corn, grain silage, access to round bale feeder, and a creek for water. The fall yearling bulls after weaning came from the top 50% of 2018 fall bulls, sorted for quality, structural soundness, and feet. We ran them in pastures this past summer getting five pounds of corn daily. This didn’t slow these fall bulls down and they are performing well this winter. Our spring bull calves come to you out of the top half of 2019 bull crop, selected on performance, structural soundness with strong emphasis on good feet and legs. I (Tom) feel this is the best set of bulls we have ever offered on feet, legs, and total package. The top of the top! These sets of calves were weaned early due to lack of rain resulting in extremely dry pastures. They are now living on corn silage, some corn, and full access to hay.

We feed daily with a high roughage diet. Before sale day we will have carcass ultra sound data, semen test results and yearling weights available.

The heifer offering is all of the K7 2019 born heifers after the bottom were sold off as feeders. These heifers are all “the keeping kind”, again, we have paired them up closely as to the type and kind along with potential. The buyer has the chance to choose from each pair and we will gladly put the other into the replacement pen. Spring and fall heifer calves are sorted the same way. These are powerful prospects on the top end and there are replacement quality heifers all the way through. I (we) are not afraid to keep anything we are offering it is the buyer’s choice.

All sale bulls have been 50K DNA tested with enhanced EPD’s. We are in the process of DNA testing the last of the replacement heifers and should be done by sale day. Veessers’ Triple E Farm and K7 Herefords would be more than happy to keep anything we are offering it is the buyer’s choice.

Thank you for your interest and support,

Tom Heidt, K7 Herefords and family

**K7 553 DOMINO 1886**

- 1886 is a low birth weight, high growth bull; he also has great carcass numbers. He is full red and is out of one of Tom’s favorite cows.
- BW 78 lb., WW 569 lb., YW 1,004 lb., SC 32.5, REA 11.55, IMF 2.05
- RE: 20/LE: 100

**1902**

- 1902 is a very moderate framed bull, he was shown at Iowa state fair. “Scotty” is a very compact bull with a thick top and nice profile.
- BW 87 lb., WW 604 lb., YW 1,096 lb., SC 36
- RE: 100/LE: 100

**1904**

- 1904 is a long made, good hipped bull that is red to the ground and structurally sound. He is a 314 son with a low birthweight EPD, and calving ease built in, with excellent marbling. He is out of a 11 year old cow that still is in the herd.
- BW 83 lb., WW 573 lb., YW 1,208 lb., SC 39
- RE: 100/LE: 90

**1905**

- 1905 is a deep gutted red bull. He is out of a longevity built maternal cow and the power/growth adding 553. If you are looking for a numbers bull to put out with your heifers he is your match! He is a heifer bull, out of an 11 year old cow.
- BW 83 lb., WW 611 lb., YW 1,193 lb., SC 39

## Reference Sires

### LJS MARK DOMINO 1321
- **Reference Sire:** LJS MARK DOMINO 1321 (DLF,HYF,IEF,MSUDF)
  - **Calved:** 3/17/13
  - **Tattoo:** LE 1321

### K7 314 DOMINO 1621
- **Reference Sire:** K7 314 DOMINO 1621 (DLF,HYF,IEF,MSUDF)
  - **Calved:** 2/4/16
  - **Tattoo:** LE 1621/RE K7

### K7 8Y LAD 1716
- **Reference Sire:** K7 8Y LAD 1716 (DLF,HYF,IEF)
  - **Calved:** 1/31/17
  - **Tattoo:** LE 1716/RE K7

Stand out with Proven Genetics

THE HEREFORD ADVANTAGE PROGRAM

Increase added market power and brand recognition with feeder cattle sired by a Hereford bull battery ranking in the top 50% for CHB$ index.

PROGRAM BENEFITS:

- EPD ranking summary
- Added market exposure
- Genetic improvement tool
- Access to AHA resources
- Get started at HerefordFeederCattle.com

“The Hereford Advantage program helps us to focus on providing the best quality genetics that we can possibly provide to our customers - the cattle feeder. We try to select bulls who will sire calves that will excel in the feed yard.”

—NANCY BOWLING
BOWLING RANCH, NEWKIRK, OKLA.

Certified Hereford Beef Index (CHBS) is a terminal sire index that is built on a production system where Hereford bulls are used on Angus-based cows with a focus on feedlot performance and end-product merit. To qualify for the Hereford Advantage program, cattle must be sired by registered Hereford bulls with transferred ownership, and the Hereford bull battery must have a CHB$ value ranking in the top 50%.
The American Hereford Association (AHA) currently produces expected progeny differences (EPDs) for 17 traits and calculates three profit ($) indexes. AHA’s genetic evaluation makes use of a Marker Effects Model that allows the calculation of EPDs by incorporating the pedigree, phenotypic and genomic profile of an animal. Animals that have a genomic profile will be denoted with a GE-EPD icon.

The current suite of Hereford EPDs and 5 indexes includes:
1. Calving Ease — Direct (CE)
2. Birth Weight (BW)
3. Weaning Weight (WW)
4. Yearling Weight (YW)
5. Maternal Milk & Growth (M&G)

Sustained Cow Fertility

The AHA’s new Sustained Cow Fertility EPD (SCF) is a prediction of a cow’s ability to continue to calve from three years of age through twelve years of age, given she calved as a two-year-old. The EPD is expressed as a deviation in the proportion of the ten-possible calving’s to twelve years old expressed as a probability. For example, the daughters of a bull with a 30 EPD bull would have a 10% greater probability of having one more calf than the bull with a 20 EPD. This is equivalent to saying that the daughters are 10% more likely to remain in the herd to age 12.

Maternal Milk (MM)
The milking ability of a sire’s daughters is an indicator trait for calving ease. It predicts the difference in average weaning weights of sires’ daughters’ progeny due to milking ability. Daughters of the sire with a +14 MM EPD should produce progeny with 205-day weights averaging 24 lb. more (as a result of greater milk production) than daughters of a bull with a MM EPD of -10 lb. (14 minus -10 = 24 lb.). This difference in weaning weight is due to total milk production during the entire lactation.

Maternal Milk & Growth (M&G)
Maternal Milk & Growth reflects what the sire is expected to transmit to his daughters through genetic inheritance and the dam’s milking ability. It is an estimate of daughters’ progeny’s weaning weight. A bull with a 29 lb. M&G EPD should sire daughters with progeny weaning weights averaging 19 lb. heavier than progeny of a bull’s daughters with a M&G EPD of 10 lb. (29 minus 10 = 19 lb.). It is equal to one-half the sire’s weaning weight EPD, plus all of his MM EPD. No accuracy is associated with this since it is simply a mathematical combination of two other EPDs. It is sometimes referred to as “total maternal influence”.

Maternal Calving Ease (MCE)
MCE EPD predicts how easily a sire’s daughters will calve at 2 years of age and is measured on a percentage. For example, if sire A has a MCE EPD of 7 and sire B has a CE EPD of -3, then you would expect on average if comparably mated, sire A’s daughters would calve with a 10% more likelihood of being unassisted when compared to sire B’s daughters.

Dry Matter Intake (DMI)
The Dry Matter Intake EPD predicts the daily consumption of pounds of feed. For example, if sire A has a DMI EPD of 1.1 and sire B has a DMI EPD of 0.1, you would expect sire B’s progeny, if comparably mated, to consume on average 1 pound of feed less per day.

Scrotal Circumference (SC)
Measured in centimeters and adjusted to 365 days of age, SC EPD is the best estimate of fertility. It is related to the bull’s own semen quantity and quality, and is also associated with age at puberty of sons and daughters. Larger SC EPDs suggest younger age at puberty. Yearling sons of a sire with a 7 cm SC EPD should have yearling scrotal circumference measurements that average 0.7 centimeters (cm) larger than progeny by a bull with an EPD of 0.0 cm.
SALE SCHEDULE
Cattle maybe viewed at any time prior to the sale and sale day.
Sunday, March 22, 2020

TRAVEL TIME
From Des Moines, Iowa, 2 hours; Iowa City, Iowa, 1 hour 15 minutes; Burlington, Iowa, 1 hour; Keosauqua, Iowa 45 minutes

INTERNET BIDDING
Internet bidding DV Auction, www.dvauction.com, absentee bidders who wish to utilize the internet may bid online at www.dvauction.com. Please register online in advance of the sale.

INSURANCE
Will be available on sale day.

DELIVERY
Single purchases made over $3,500 will be delivered free up to 200 miles. All others we will assist in delivery and make every effort to help you get your cattle home at a reasonable cost.

TERMS AND CONDITIONS
- Each bull will be sold to highest bidder without reservation. The auctioneer will settle any disputes as to bidding and decision will be final.
- Terms of all sales will be cash unless arrangements are made between purchaser and seller prior to sale.
- Individual health papers will be furnished with each animal permitting shipment to any state.
- The animal becomes the property of the purchaser as soon as sold, but it shall be responsibility of the seller to see that the animal is properly cared for until delivered to the purchaser. Any death or injury after the animal is sold is at the buyer’s risk.
- Anyone attending the sale attends at their own risk and without liability on the part of the owners or their employees.
- All animals of breeding age are guaranteed breeders. All untried animals are guaranteed to be without known defects, but nothing further. Animals failing to breed after a trial of six-months may be returned to the farm of the seller if in good condition. The seller reserves the right for six-months to try said animal and, if it proves a breeder, to return it to the station of buyer at his expense. If the animal proves a non-breeder, a satisfactory exchange will be made. Complaint must be made within six months from the time of purchase.
- Extreme care has been taken in copying each and every pedigree to avoid errors, but we are not to be held responsible for any error which might appear and which is beyond our control.

HEALTH
Cattle are under the care of Village Vet, Fairfield, Iowa. A veterinarian will be available sale day to write health papers.

SEmen TEST
The bulls will be semen tested prior to the sale and will sell as guaranteed breeders. Bulls will be trich tested if needed.

Complete ultrasound and performance records will be available on or before sale date.
