

BANKS POLLED HEREFORDS

PRODUCTION SALE

SATURDAY | OCTOBER 31, 2020 | 12 PM CDT

At the ranch in Ada, OK

BANKS POLLED HEREFORDS

Dear Friends,

We are pleased to invite you to the Banks Polled Herefords Inaugural Production Sale on October 31, 2020 at 12:00 Noon CST. We assure you no tricks and all treats with this year's offering.

This sale is three years in the making as the operation has experienced a lot of change and growth over the last several years. For generations the Banks family has always called Ohio "Home". Doug and Jane grew up with Hereford cattle, meeting at the county fair, and later going on to marry in 1966, after which they never spent a day without their Hereford Cows. Years later the pair found themselves and their cows on a ranch in Ada, Oklahoma where Son, Brian, his wife, Chrissy and most specifically their Grand-daughter, Emmy, reside. While people may have questioned their sanity at the time, one winter; free from knee-deep mud, and they were sold – again.

Soon after the move the opportunity to purchase a group of bred cows from Mead Farms in Missouri presented and we were lucky enough to purchase 30 pairs. We are pleased with how well these genetics not only complement our program but enhance it. Our focus has always been to produce functional cattle with balanced EPDs while emphasizing strong maternal traits, carcass quality and growth. For over 25 years we have been collecting and analyzing data through ultrasound and other measures, and as such, have been recognized by the American Hereford Association as Gold TPR (Total Performance Record) Breeders. This past fall Doug and Jane were recognized as "Fifty Year Breeders" by the Hereford Association and have raised many "Dams of Distinction" throughout the years. Brian and his wife, Chrissy are dedicated to continuing the legacy of producing iconic mama cows and industry leading genetics.

This sale represents the continuation of a legacy by which the next generation will produce cattle in all stages of production from young bulls to bred heifers as well as bred cows and calves. This offering gives seedstock and commercial producers the opportunity to benefit from the enhanced genetic packages we offer and our hope is that these cattle live on to do great things in those herds.

In closing we want to take the opportunity to reflect on the beginning of 2020 as it's been one for the record books. As many of you may know we lost our beloved Jane in the spring after a tough battle with ovarian cancer. Our lives aren't and will never be the same. Sale time is a bittersweet time for us as we know Jane would have loved it. Jane not only dedicated her life to family and Hereford Cattle, but also to the family she gained as a result of Hereford Cattle. She was "show mom" to so many and loved attending sales and cattle shows where she got to visit with her friends who were spread out all over the country. We take comfort in knowing her legacy lives on in these cattle and in her grand-daughter who will soon enough be headed for the show ring.

We are happy to answer any questions you may have and welcome you to preview the cattle Friday evening October 30th here at the ranch and again in the morning on sale day. We look forward to seeing you!

Many Thanks

The Banks Family – Doug, Brian, Chrissy and Emmy

- ★ Vickie 2G is simply gorgeous and exactly how we wanted to lead off the sale! Dark cherry red with all the cosmetics you would desire. Long bodied with a tremendous amount of depth and rib. With her added look and style, she is destined for the donor pen. Her dam stems back to the Lady 304U female that will show up in several of the pedigrees in this catalog. She ranks in the top 8% for all her dollar indexes and in the top 2% for CHB.
- ★ Retaining the right to 1 future flush with a minimum of 6 transferable embryos at the buyers convenience and the sellers expense.
- ★ Ranks in the top 2% for CHB; top 4% for REA; top 10% for CW and top 25% for MARB.

- ★ We are excited about these Sinatra daughters. They are big and broody that have plenty of spring of rib and depth. 5G is clean lined, well balanced female that will make one heck of a cow. We are strong believers in cow families and 5G is backed by some of the best, Beth 1L, 304U, 4297 and Y526. Both her of her maternal granddams are Dams of Distinction. She can add value with her carcass quality and maternal pattern. Her BMI and BIL are in the upper 10%.

DJB 200Z Red Bull 75F
Pasture Exposure Service
Sire on Lots 1 - 10.

First and foremost on behalf of myself and Matt Sims we would like to welcome you down to the beautiful Banks Polled Hereford Ranch located in Ada, OK for their Inaugural Production Sale to be held in Oklahoma. The Banks family are no strangers to the Hereford Seedstock business as they have held Production sales in Ohio and have sold several prominent females private treaty throughout the United States. One of the most notable females to derive from this strong breeding program is the immortal donor dam DJB 46B Beth 1L, better known as just 1L, the full sister to the maternal breeding giant P606 who currently resides in the donor pen at Iron Lake Ranch in Athens, TX at 19 years of age.

As you study the offering you find an elite set of females that excel in maternal excellence and value added carcass merit. The Bank's family has strived to produce functional females that excel in the pasture and the rail. This sale starts with a powerful set of spring bred heifers that Matt and I sorted and picked out of a group of 35. They let us pick right from the heart of the herd and we are excited to help market this set of bred heifers. Next you will find an outstanding set of spring heifer calves that have been weaned and will sell as individual sells.

As we move into the spring HC split pairs we start with a powerful leader 2 year old who produced what we feel is truly one of the unique heifer calves in the offering. This set of HC split pairs is loaded with future value for their new owners. In the BC split division you will find several elite females that have future herd bulls at side. There are not many fall bred but the quality is excellent and several stem back to the immortal 1L. The service age bulls are stout, rugged, sound and ready for heavy service. We end the seal with a really nice set of functional Angus females that are flat out producers.

In closing we along with the Bank's family invite you to be with us on Saturday, October 31 in welcoming the Bank's Polled Hereford Ranch to Oklahoma. They are a hard working honest family that I have had the pleasure of doing business with over the course of my profession. If you have any questions about the offering please do not hesitate to contact Doug, Brian, Matt or myself as we will be more than happy to answer any of your question.

Thanks and Happy Halloween!

Dustin N. Layton

Matt C. Sims

- ★ Beth 93G has a tremendous amount of look and style. Her dark red color goes all the way to the ground. Her phenomenal structure gives you the right balance of eye appeal and longevity. Gorgeous up front that still maintains plenty of power as you move around her. Her mother, Beth Y526, is a Dam of Distinction and daughter of the immortal Beth 1L. Y526 influence can be found in several other lots in this sale. Big time cow power with time tested genetics how can you go wrong.
- ★ Ranks in the top 4% for UDDR; top 10% for TEAT, REA and top 15% for BW.
- ★ **Sells open.**

Stand out with Proven Genetics

THE HEREFORD ADVANTAGE PROGRAM

Increase added market power and brand recognition with feeder cattle sired by a Hereford bull battery ranking in the top 50% for CHB\$ index.

PROGRAM BENEFITS:

- ✓ EPD ranking summary
- ✓ Added market exposure
- ✓ Genetic improvement tool
- ✓ Access to AHA resources
- ✓ Get started at HerefordFeederCattle.com

“The Hereford Advantage program helps us to focus on providing the best quality genetics that we can possibly provide to our customers - the cattle feeder. We try to select bulls who will sire calves that will excel in the feed yard.”

-NANCY BOWLING
BOWLING RANCH, NEWKIRK, OKLA.

Certified Hereford Beef Index(CHB\$) is a terminal sire index that is built on a production system where Hereford bulls are used on Angus-based cows with a focus on feedlot performance and end-product merit. To qualify for the Hereford Advantage program, cattle must be sired by registered Hereford bulls with transferred ownership, and the Hereford bull battery must have a CHB\$ value ranking in the top 50%.

Take advantage of hybrid vigor by capitalizing on Hereford genetics.

The Maternal Advantage program generates females with added longevity, more docility, increased fertility and more profit per year.

Can be utilized by producers using Hereford bulls on British-based cows or Brahman-based cows in their breeding program.

Producers utilizing the program will have access to a sire EPD summary, added market exposure, replacement selection tools, genetic improvement tools and access to AHA resources, marketing and staff.

Qualifications

- Producers must verify that eligible females are sired by registered Hereford bulls with transferred ownership.
- Participating bull batteries must rank in the top 50% of the breed for Baldy Maternal Index (BMI\$) if used on British-based cows or the top 50% of the breed for Brahman Influence Index (BII\$) if used on Brahman-based cows.
