WELCOME TO OUR 42ND ANNUAL SPRING BULL ROUNDUP!
Wow, what a year 2020 was! Hope your family is healthy and thriving during these unsettled times. In times like this, we are grateful to be a part of the ranching and agricultural communities that are proven to be among the most resilient in the world.

“From cowherd to carcass …we test them all the way.” This has been our breeding philosophy to produce cattle for all segments of the beef industry …the foundation behind our HS Brand for decades.

Commercial rancher operations, today, have the opportunity to purchase bulls from multiple seedstock programs. Many breeders chase fads, changing direction every few years. We, at HHR, take pride in staying true to our roots and philosophy building a program that’s based upon 50 years of industry experience; doesn’t waiver or compromise; stays true to an industry that rewards dedication and hard work; and strives continuously to improve our customers’ bottom line.

The path to produce this 2021 offering started months ago when mating decisions were made. As a breeder, we may be happy with the product of a mating, but we know if we look close enough, there is always one that has a lighter birth weight, better udder, weighs more, gains faster or earns more carcass grid premiums. We are never content …our work for the “total package” is never done. Our cattle have undergone countless evaluations that may seem inmaterial to some, but when added up are monumental. The predictability built into our herd generations deep has delivered an advantage. We take pride in presenting a “Genetics and Performance-Focused” program built to serve registered and commercial cownmen.

Please join us March 1st to check out this elite offering of cattle that have made it to the finish line for consideration in your program.

Your friends, Bob Harrell Jr. and the Harrell & Mackenzie Families
