Live bidding available on LiveAuctions.tv
Contact Katie at 208.599.2962 or tech support at 682.816.4900**SALE TERMS & CONDITIONS**

TERMS ... Terms of the sale are cash unless prior arrangements have been made. When making settlement, please leave specific instructions in writing for transfer and delivery.

SALE CONDITIONS ...

- Each animal will be sold to the highest bidder. The auctioneer will settle any disputes as to bids, and decisions on such matters will be final. Each animal will be at purchaser's risk as soon as sold and will be turned over to the purchaser as soon as practicable after settlement. All announcements made from the auction block on sale day by the owner or the auctioneer will take precedence over statements in the catalog.
- Colyer Herefords will precondition and wean heifers prior to shipment.
- Buyers have the option of leaving females at Colyer Herefords and having them exhibit the heifers at the national shows.
- Buyer must insure their purchase while being in the care of Colyer Herefords.
- The total cost of exhibiting the heifer at Reno will be \$1,500 and Denver, or Fort Worth will be \$1,800 per show. This includes entries, show preparation and related show expenses.
- Due to increased feed costs, an additional \$8/day will be charged while the heifer is at the ranch, beginning November 1, 2023.
- Any banners, ribbons or hardware won will belong to the buyer.
- Buyer will take possession after the respective show and will be responsible for arranging transportation.
- Females that are sold as 1/2 interests, the costs will be split 50/50.
- Ownership choices – One-half interest vs. two retained flushes. We have found that some buyers like to own the entire animal and some like to only own one-half interest, therefore, we have come up with this concept so the buyer can choose which one they would like.
- 1/2 Interest Option: If one-half interest is chosen, the buyer will own one-half of the animal. The buyer will pay one-half of the show cost. It is the same as it has been every year on cattle where we have retained one-half interest. We will keep the female and breed her and when flushed, send half the eggs to the new owner. Colyer Herefords will

pay maintenance costs of the female after her show career. Buyer will pay for their portion of the flush cost when embryos are sent to them or we will alternate every other flush with the new owner, attempting to get equal amounts for each party. If the buyer has the ability to flush the female at their location, they can take possession of the animal and we will assume the opposite position and take one-half the embryos or alternate flushes.

- Retain Two Flush Option: If this option is chosen, the buyer will take possession of the heifer after her show career is complete. If shown, the buyer will pay full show expense. Colyer Herefords will retain the right to flush the female twice after she is in production, at the buyer's convenience, for a minimum of six No. 1 eggs.
- Colyer Herefords retains the right to one flush on all females in the auction.

GUARANTEE ... All cattle are guaranteed to be breeders. In case an adjustment is required, it will be made with a replacement animal of equal value to the animal in question or credit on the purchase of another animal.

GENETIC ABNORMALITIES ... Any cattle with a questionable parentage have been DNA tested and are IEF.

BREEDING INFORMATION ... Current breeding dates and calving dates are furnished in the catalog. Any changes will be announced sale day.

NOTE ... Everyone attending this sale does so at their own risk. Neither the owners or their employees assume liability, legal or otherwise, for any accidents which may occur.

DELIVERY ... Buyers are responsible for shipping expenses. We will help coordinate shipping to combine possible loads. Cattle will be kept for a reasonable length of time following the sale until delivery or pick up can be made.

ABSENTEE BIDS ... If anyone wishes to bid and cannot attend the sale, we would accept phone bids. Phone in bids with satisfaction guaranteed. We realize everyone's busy schedule and the expense of travel. Please feel free to contact Guy or Kyle for any of the sale representatives listed. The sale will be broadcast on LiveAuctions.tv for live Internet bidding.

22nd Annual FEMALE SALE OCTOBER 7, 2023

at the ranch, Bruneau, Idaho

Welcome to our 22nd Annual Fall Female Sale

This is always an exciting sale for us as we offer our “Best of the Best” in females. These females are the best we have in every division. The open heifers are elite in terms of show potential and future donor potential. Among them will be the first Guardian females to sell anywhere in the world. The bred heifers are once again a real strength. Every early bred heifer that is carrying a heifer calf will be offered! This is a must see set of females.

The set of Angus femals are also our very best. Don’t overlook the potential in the Angus division.

The embryo and semen packages also provide our freshest genetics.

The strength of our breeding program are the cow families within it. They have the Phenotype to be show ring competitive and are backed by breed leading numbers.

We truly hope you can come to the ranch to inspect the offering. Pictures and videos must be done in early August for the catalog and the weather is extremely hot. The cattle really come on later as the temperature cools.

Do not hesitate to contact us with questions or comments.

Thankyou for all your continued support of our program.

Lot 4

Lot 5

This flush of sisters will be a big attraction on sale day. All of them are a bit different yet they all have a ton of quality. We feel this Lot 3 female is the best show heifer prospect we have ever produced. She is one of those that you never get a bad look. She is so great necked and perfect in her spine and topline. Lot 5 is the most muscular one with a huge top and hip. Lot 4 is the one that is more center and is the combination of the two. These females come from a long line of show winners both top and bottom. Out of a Belle Air daughter and Candy Cane the three time National Champion Female.

Big time cow power in these two sisters with quality and performance. They are bred to be the donor kind that offer diversity when planning mating's. If you want to breed for numbers they have the phenotype to carry the heavy lifting. If you want to breed some show heifers they are one mating away from making a great one. The structure, build and power is here, out of the many times proven donor 4264. She is also the mother of Belle Heir and many other herd sires.

Exciting mating that will get your attention. These two sisters bring a lot of things together in one package. Birth to yearling spread with extra IMF but still have the look and phenotype to go with it. This Lot 8 female has a great rib cage with an elegant look. Lot 9 is the more muscular option with a huge top and hip. The donor dam 8037 is the mother of the record selling herd sire Guardian. She sells as Lot 31 in this auction. Owned with Iron Lake Ranch.

Interesting pair of females here sired by 9490 out of 1313 who is a full sister to Miles and 1311. This lot 11 heifer is made so well in terms of combining look with power. Extra bone and shape but still has a great look through her neck and head. Lot 10 is on an older recip and hasn't had the start of some of the others, but if you are looking to slip out a green one that has the parts she could be very affordable and a great spring/summer show heifer with the right care.

We are not sure, but this might be the one when all the dust settles. Always bank on the 1311 calves because they will never disappoint. She has a full brother that is a sight to see and will likely be the bull we choose to show this winter. This heifer is behind on condition but not quality. If we were choosing a Junior National type show heifer that will duel as a donor cow this is the one. She is rocket necked and her skeleton and rib shape is right. 1311 is a million dollar cow and without a doubt one of the breeds elite. She is the mother of too many herd sires to list but her most recent, Arlo has been one of her best.

This is the kind that will keep you in business. She is on the right side of breed average for every trait and excels in terms of udder quality and longevity. She is dark red with extra look and body depth. Her skeleton and lines make her so attractive from the side. Her mother 0132 is a great young donor that was flushed as a first calf heifer because of her added udder quality.

This is donor cow material here. This one just has that look of a brood cow that will maintain her flesh easy and be the kind that makes money. Her sire 0195 was purchased by Sommers in Wyoming and doing a tremendous job. He sired the 26A female in last years auction going to GKB and was named the Champion Polled female in Reno and Division Champion in Denver. Her grandmother 6133 is a former high selling Lot 1 donor going to Bowling in Oklahoma.

This one is really green in her condition but we couldn't pass her because of her great neck and design. Here is another one that a junior exhibitor should grab ahold of and with time and the right care she will be really good. Not only will she be a competitive show heifer but she has the numbers and cow family's behind her to build a herd around.

This is one of the oldest Guardian daughters available and one of the top cow prospects in this entire sale. After writing footnotes and then landing on this one so much good to say and hard to condense and put into words how elite this one really is. You can open the book on her EPD profile but we have been talking about IMF for years and this one not only has it, she has the rest of it to go along with it. This is not just a fancy numbered one that you can't stand to look at. She has a great look with extra pigment and color. Her mother has an ideal udder and a role model type of cow.

This is a sale feature and a great way to kick off this years cow sale. At such a young age 8037 has done so much being the mother of the record selling Guardian herd sire along with many great daughters. This is a cow we never thought would be available for sale but Dimitri is needing to sell his partnership cows so she along with many offspring are available to purchase. Her added power, performance and IMF numbers will compliment almost any mating and we feel she is the kind that can lead a program into the future. She has been flushed four times and has produced an average of 11 embryos per flush. She has bred back every other year after flushing her but this year she sells open and ready to flush this fall. She is currently nursing her natural calf so she is ready to roll into the donor pen.

This cow could easily start the sale but with a cow like 8037 available this one will follow. 8300 does so many things right from a production standpoint and when you glance at her pedigree and see Black Hawk Down out of 2052 you can understand why. She is moderate sized and has a great udder but what is so impressive about this one is her ability to wean such a large percentage of her body weight. This is the kind of cow that will plug a lot of holes with her added IMF and calving ease genetics. She is the perfect blend for Guardian who she is bred back safe to again.

This one will no doubt be one of the popular calves this fall. She is a joy to look at with her added shape and bone along with that elite look through her front third. She will run with any of the ET calves and we feel that she could have a big future in the showing. Her mother is a full sister to National Champions Eye Candy and Candy Cane and with her top side of 9490 it is no wonder why she has this look.

AI bred, due 01.05.2024 to C Genesis 2113 ET.

This is a deep red, heavy pigmented cow that has a set of numbers that will keep a breeder in the game from all angles. She is attractive and well balanced with a standout look. She is bred to calve early January to one of our popular Champion pen bulls 2113. He was the best numbered of the three and had extra IMF so we decided to double down with this mating.

 REMITALL RITA 91H

Embryo bred, due 09.21.2023 - Guardian x 929
 This female was purchased in partnership with Iron Lake from the NJW program in Wyoming. She is a lot like her dam 79Z who is the mother of Endure, Mighty, and Heavy Duty and many other herd sires. She has a great EPD profile and with her body mass and fleshing ability she is making a great young cow. Her first daughter sells as lot 30. She will calve by sale day. We flushed her and then put an embryo back in her to keep her calving on time. Owned with Iron Lake Ranch.

BW 91H 100W Rita 79Z ET, dam of Lot 72.

 GERBER SQUIRE 627S
 GERBER 116K HOLLY T115

AI bred, due 09.20.2023 to C CJC 4264/4013/0195.
 This is a dark red, heavily pigmented cow that is a maternal sister to the proven performance sire Gerber Anodyne 001A. We have flushed this cow to Guardian where she gave 12 good embryos. Those embryos can be found as lot 91 in this auction. Exceptional tear and udder scores on this cow being in the top 4% and 1%. She should calve by sale day.
 Owned with Iron Lake Ranch.

In terms of phenotype its hard to build one much better than this. She is a joy to look at and I wish more cows could put it together like this one does. She is so impressive in person but if you are unable to attend watch her video. Stout, sound, good look and great feet and bone. We flushed this cow last spring because she has what we all need.

 C NOTICE ME ET

Arlo was the lead-off bull in our Denver 2023 Champion Pen of Bulls. He was one of the most talked about young calves we have ever raised. After that he was the high selling bull in our 2023 sale for \$165,000 to Hoffman Herefords, Nebraska and Buck Cattle, Oklahoma. One week later we held a special auction for semen sales where he more than paid for himself in one night selling over 600 units for a gross of \$270,000. This young sire is exciting on many levels. He has the structure and build to put him in the same conversation as Miles but this one has the color and pigment along with the carcass traits to make him the next level of genetic capability. This is the first time semen has been offered since last spring and this will be the only sale for early fall breeding that it will be available. We are also selling two lots of sexed female semen for the first time.

Owned with Hoffman Herefords, NE and Buck Cattle, OK

High selling bull in the 2022 National Hereford Sale at \$325,000 for 1/4 interest valuation. Guardian brings the power, performance, phenotype and carcass merit unmatched in the Hereford breed. 85 lb. birthweight, 924 acr. WW, 964 adj. WW with no creep and weighing 1,315 lb. at exactly 10 months. Dam is a full sister to Belle Heir with a WWR of 108 on two head. Her individual IMF ratio is 152 and her first calf scanned an IMF ratio of 152 and ribeye ratio of 105. Grandam is by the \$600,000 Miles McKee and dam is the \$117,000 89T. She boasts an IMF of 124 and ribeye ratio of 103 on 24 progeny. The first calves are being offered in this fall auction and we feel they are a very impressive group. A limited amount of semen will be sold this fall and only offered at auction.

Owned with GKB Cattle, Iron Lake Ranch, Schrammel Cattle Co. and Randy Ward.

This is the first opportunity to really get a look at what 9490 can do with this set of calves. He is the sire of so many great show heifers in this auction and lots of bulls that we will show this winter. He provides so much look and power to a cross. Not many have discovered this bull yet but after you see his offspring in this sale we feel his semen will be in demand.

This young sire proved to be very useful when calving and breeding replacement females this spring. He is out of a first calf heifer that made it straight to the donor pen. Use this one for udder quality and calving ease but also his carcass values and look makes him big time herd sire. Breeders around the country are excited about the calves by Key West.

Belle Heir is currently in the top 10% of the breed for 13 traits. Rarely does a young herd bull surface that does so many things right for the industry. He has been used successfully on heifers providing calving ease and light birthweights. His calves show explosive growth and have structural integrity and extra pigment. The carcass figures rank him among the breeds elite. He is currently enrolled in the National Reference Sire Program. He is so impressive to look at in the breeding pasture because of his massive build and his structural soundness. He has the extra pigment and dark red color that are demanded in today's industry. His first daughters calved in the spring of 2022 and they are very impressive.
