Double J Herefords

Iowa Falls, IA 50126

Colin Johnson 641-229-5088

Lynn Johnson 641-373-3445

Kevin Johnson 641-373-1048

A close-up, artistic photograph of a horse's head. The focus is on the horse's eye, which is partially visible on the right side, looking towards the viewer. The mane is long and wispy, flowing across the top and left side of the frame. The lighting is warm and golden, highlighting the texture of the horse's coat and the individual strands of the mane.

AN EYE FOR CATTLE.

QUALITY, CONVENIENT INGREDIENTS

Whether you are looking for distillers grains (DDGS), high protein ingredients or pelleted feed solutions, we have a product for you.

Dakota Gold® is POET's branded DDGS product which provides superior palatability and nutrient value to maximize your feed's digestibility and performance.

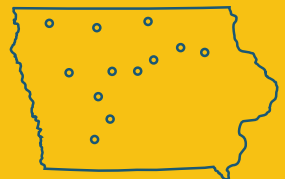

Traditional DDGS are a nutrient-rich co-product of the bioethanol process that offers a quality, low-cost alternative feed ingredient: they're rich in protein, minerals, and fiber that animals need.

ProPellet takes the traditional loose form of our Dakota Gold dried distillers grains and presses it into a pellet form which ensures uniform particle size, decreased shrink loss, and provides superior handling with better flowability.

NexPro® is a next-generation, 50% protein ingredient, which is a great choice for a multitude of animal feeds, including poultry, swine, dairy, aquaculture, and pet food.

BJK Farms

Brian and Jennifer Kreutner Farms

Our family has been passionate about purebred Herefords since the 1930s. In 2011 we started selling horned and polled bulls, heifers and bred heifers by private treaty. We select for docile temperaments, easy calving, and good growth and carcass characteristics. Check out our available bulls and heifers at www.bjkfarms.com.

THE CHOICE IS YOURS

VitaFerm® Concept•Aid® is a line of vitamin and mineral supplements for beef cattle formulated to promote effective, easy breeding when fed 60 days pre-calving through 60 days post-breeding. High concentrations of vitamin E and organic trace minerals, coupled with the Amaferm® advantage, supports quick repair of the reproductive tract and more energy for reproductive success.

VitaFerm® Concept•Aid®

For more information, contact your local BioZyme® Area Sales Manager: **Brenen Diesen** (618) 409-2365 or visit vitaferm.com to find a dealer near you.

Cooperia (shown here) is one of the most prevalent internal parasites in U.S. cattle herds. And infected calves experience 7.4% less average daily gain.¹

DON'T LET MONSTROUS PARASITES BITE YOUR BOTTOM LINE

Choose **SAFE-GUARD®** (fenbendazole) when you deworm to take out more profit-eating parasites.

SAFE-GUARD is shown to kill 98.7% of worms, remaining powerful and effective, even in the face of avermectin resistance. Ivermectin on the other hand, is only 45.9% effective.¹ That's a lot of worms left behind to feast. Talk to your veterinarian about switching from ivermectin (or any other -ectin dewormer) to SAFE-GUARD – the right choice for your cattle and ROI.

BITE BACK AT KILLMOREWORMS.COM

IMPORTANT SAFETY INFORMATION: Do not use in beef calves less than 2 months old, dairy calves and veal calves. A withdrawal period has not been established for this product in pre-ruminating calves. Additionally, the following meat withdrawal and milk discard times apply: SAFE-GUARD Paste: Cattle must not be slaughtered for 8 days. For dairy cattle, the milk discard time is 96 hours. SAFE-GUARD Suspension: Cattle must not be slaughtered for 8 days. For dairy cattle, the milk discard time is 48 hours. SAFE-GUARD En-PRO-AL Type C Medicated Block: Cattle must not be slaughtered for 11 days. For use in beef cattle only. SAFE-GUARD 20% Protein Type C Medicated Block: Cattle must not be slaughtered for 16 days. For use in beef cattle only. SAFE-GUARD Type A and other medicated feed products (pellets, cubes, free-choice mineral, or free-choice liquid): Cattle must not be slaughtered for 13 days. For dairy cattle, the milk discard time is 60 hours.

¹Stromberg BE, et al. *Cooperia punctata*: Effect on cattle productivity. *Vet Parasitol.* 2012;183(3-4):284-291.

AM I FULL OF CRAP?

Calf scours are not inevitable. A strong prevention program is non-negotiable. Dependable scour prevention is essential for calf welfare, employee morale and business profitability. The immune system's response to vaccination is variable and unpredictable. That's why giving preformed antibodies instead of relying on a vaccine to stimulate antibody production is so important. I'm all for removing uncertainties. So yes, I stand by this product. (And no, I'm not.)
