 focusmarketinggroup.net

Dear Hereford Breeders and Enthusiasts,

Welcome to the National Western Hereford Sale "Herefords in the Yards." One of the most talked about subjects over the past two years is the excitement and optimism of the new Yards at the National Western. As the numbers of Hereford Yard cattle surges for the second straight year, the very best the Hereford breed has to offer will be at the National Western Stock Show.

For generations, the Yards at the National Western were known as THE place to merchandise and promote the best Hereford genetics found anywhere. Breeders from across the United States & Canada have come together to offer the most superior genetics in the breed for this once-a-year event! With over ninety head featured, there is not just one single lot, but each and every lot will appeal to multitudes of Hereford breeders looking to move their programs to new heights.

The bulls and females presented in this catalog represent some of the finest genetics available today in the entire breed. They are the type of genetics that can make an immediate impact in a lone generation in any program coast to coast. In addition to the live lots, we are offering some "pick of the herds" that represent the type of elite genetics that aren't available anywhere at any time. The revenue potential that exists in this sale offering is second to none, and the impact these genetics make in the breed will be felt for generations.

There has been a lot of discussion recently regarding the new genetic abnormality DB. Due to the fluidity regarding the cattle involved, there is intentionally no potential carrier information in this catalog. A supplement sheet will be made available sale week listing the genetic abnormality status of the sale offering.

We wish to invite you to the 2024 National Western Hereford Sale. If you are unable to make it to Denver, the sale will be broadcast on CCI Live. If you have any questions about the sale offering, please contact myself, the sale consultants, or any member of the sale staff.

Welcome to the National Western...welcome to the Yards.

the auctioneer settling any disputes. Announcements at the sale by the owner, sale manager or auctioneer will take precedence over statements in the catalog. Each animal becomes the buyer's risk as soon as sold but will be cared for by the seller until load out or for a reasonable period of time. All transactions will be in U.S. dollars.

Guarantee: All cattle will sell under the suggested terms and conditions of the American Hereford Association.

Health: Health of the consignments is excellent. Individual health papers will be furnished for shipment in the United States. All animals become the property of the purchaser at the time of sale, and we strongly recommend that you insure your purchases. Bulls over one year of age have been fertility tested and will guarantee semen to freeze. Bulls have been trich tested. All sale cattle are P.I. tested negative.

Insurance: Sheila Jensen (785) 262-1116

Delivery: Delivery costs and arrangements of sale animals are the responsibility of the purchaser. Sale personnel, consignors, exhibitors, and various reputable trucking firms will be on hand to assist with transportation arrangements.

Performance information: All EPDs are current according to the official AHA record as of December 1st, 2023, and are subject to change.

Payment: Payment for each lot in the 2024 Herefords in the Yards Sale is to be immediately after the sale. The buyers who choose to be billed need to make payment as soon as possible after the sale. Interest will be accrued on unpaid balances starting on March 1st, 2024, at the rate of 1.5% per month, 18% annually.

Note: All persons who attend the sale do so at their own risk. Neither the National Western Livestock Show, the owner(s) nor the sale manager assume liability, legal or otherwise, for any accidents which occur.

1 | TOPP HEREFORDS CHOICE OF BRED HEIFERS

This is the third time we have offered the opportunity to tap into the number one resource we have ... our replacement bred heifers! The first two times we've offered this choice lot, the response has been overwhelming. The only time we offer this is in this yearly Herefords in the Yards Sale. Our maternal battery is bred for and focus on one primary goal ... raising commercial bulls. If you study the results, year in and out the Topp Herefords Bull Sale is one of the top performing sales anywhere in North America.

We believe that a true Seedstock operation's commitment is to develop genetics that ultimately drive the meat industry forward. Our success is measured by our contribution to the sustainability of our commercial cow-calf customers.

Our cow herd is built on a foundation off four core values: udder quality, soundness, fertility, and pounds. The structure by which we analyze these traits may be called old-fashioned by some. However, the process is real and exceptionally ruthless.

Udder quality is determined at calving time by a simple 1-2 grading system. A 1 is great and a 2 is a cull. Soundness is determined during spring vaccination season. A female with a cracked foot, bad joints, poor disposition or hard-doing is sorted of and not even bred. Fertility sorts itself out quickly with a 45-day breeding season. Finally, pounds weaned. If they don't bring in a heavy calf, there is a pretty good chance she won't be calving here next Spring. To round out our selection process, we have been DNA testing since 2013 to provide parentage, identify genetic defect status and increase the accuracy of EPDs.

Buyer will have the opportunity to select from over 300 bred heifers. The majority of these bred heifers are AI bred. All will be calved out to further enhance the selection process. Selection is to be determined between May 1 and May 15, 2024.

2 CHOICE OF 7098 DONOR PROSPECTS FROM CHURCHILL CATTLE CO.

November 15th, 2019... the Hereford breed was forever changed when Dale purchased ½ interest in BR Validated B413 6035 7098 from Birdwell Ranch. Since that day, her progeny have been some of the highest demand cattle of any breed including major AI sires such as Kingdom, Red Thunder, Redbird, Wall Street, Bullnanza among others. 7098 is the #5 female in the breed with her combination of Ribeye Area & Marbling, and when you take her production EPDs into account, she is still #1 in the entire breed.

Perhaps most important is her phenotypic makeup. A wise man once said, "not all high numbered cattle have to be ugly." 7098 is the prime example of that.

Now that moves us into these three daughters. You've got choice of the 3 females representing the top of each age group that Dale has ever produced. These three females represent the future of the Churchill Cattle Co. program, and you have the opportunity to share in that future by selecting a donor interest in one of the three. The Homozygous Polled 2213 bred heifer is a carbon copy of her mother and a full sister to the popular New Standard bull. The fall born Expedition daughter is #1 among all the Expedition progeny, male or female, for carcass EPDs and she's still at the top of the breed for production and maternal numbers. Rounding out the trio is the elite Final Print heifer baby. Among all Final Print progeny on record, 3121L is #1 for MARB & #2 for CHBS along with being the #2, 7098 daughter for WW.

A difficult choice awaits, but one that will yield tremendous results for years. The opportunity to partner with Churchill on an ET interest in one of these great females will place you in the driver's seat for marketing high value progeny. Videos of these females selling will be available and shown sale day as they will not be in Denver. Selling ½ embryo interest in the female of buyer's choice. Churchill will retain possession, but the buyer will have the option to double the bid for possession rights.

3 | COLYER HEREFORDS CHOICE OF FALL 2023 CALVES

Colyer Herefords is without a doubt one of the long-standing, most successful programs in the nation. When you look at the number of walking herd sires, in addition to the popular AI sires within the breed, the influence of the Colyer genetics is second to none. In recent years with the growth of their Fall Female Sale, the Colyer female has become one of the most coveted assets in the entire breed.

On the grand stage in Denver, you're buying the Choice of Fall 2023 Calf Crop from Colyer Herefords. There are a total of 97 calves to choose from with 40 of them being ET calves with the majority of the rest AI sired. For proof of the potential in this lot just look at the C D83 Miles 1266 ET, a product of the Colyer Fall breeding program. She was Reserve Champion Horned Female at the 2023 Cattlemen's Congress. Overall, when you look at the maternal power represented not only in these photos, but across the board on this Fall pick there is no doubt this lot is one to seek out. One highlight are 3 calves out of C 88X Notice Me 1311 ET, the dam of C Arlo 2135 ET which is one of the most exciting young sires today. In addition, 1311 is the dam of National Champion Double Your Miles, Special Edition, among several others.

Other highlights of the sires represented in this pick:

- 19 calves sired by C GKB GUARDIAN 1015 ET - \$325,000 top selling bull at Cattlemen's Congress
- 20 calves sired by C REAL DEAL 0137 ET
- 19 calves sired by ECR 628 ADVANCE 9490 ET
- 17 calves sired by C BARRACUDA 0114 ET - Top selling calving ease bull at ABS
- 8 calves sired by C 8086 SANCHO 1084 ET - 2022 NWSS Grand Champion Horned Bull

Buyer will receive listing of GE-EPDs on the entire calf crop to assist in selection.

4 | COYOTE RIDGE RANCH PICK OF 2024 HEIFER CALVES

When you think of Hereford cattle at the National Western you instantly think of Coyote Ridge Ranch. Hampton & Jane have grown CRR into one of the preeminent programs in the breed. Look no further than their recent results at the NWSS where they've been selected the Grand Champion Pen of Bulls 7 times! On top of that, when you think on some of the greatest herd sires in recent history, you can't escape the influence that CRR has had.

CRR is a three-generation family operation located on the high plains of Colorado in the shadow of the Rocky Mountains. Hampton and his family run a real-world western range program with a proven track record of calving ease, maternal efficiency and superior growth backed by 40 years of actual performance records & dam production records.

A program truly built for today's beef industry with performance documented over 15 years of retained ownership and feedlot data on CRR steers. The cowherd consists of dependable, problem-free cows that work for a living.

This is a lifetime opportunity to step in and select your favorite heifer on the place born in 2024. CRR will calve 180 pairs beginning in February.

In addition to the outstanding lineup of pasture herd sires CRR is known for, you'll have to opportunity to select progeny sired by some of the leading AI sires today:

5 | DVORAK HEREFORDS PICK OF THE 2024 BORN HEIFER CALVES

We are privileged to offer the Pick of the 2024 born heifer calves. For so long, our focus has been producing Hereford ranch bulls, geared to the commercial industry. Our foundation has always been to start with sound, functional and maternal cows. We have established a herd bull battery we feel not only compliments our herd, but will take our breed into the future.

If you are looking for your next show prospect or future donor dam, this is an exciting opportunity to hand select from nearly 150 registered heifer calves.

Many of these offspring will be sired by SR Expedition 619G, KSU Land Grant 153ET, JDH AH Lincoln 106H ET and RST Final Print 0016 in addition to our great lineup of walking herd sires. For an added bonus, 2024 will be the first year of Lincoln and Final Print daughters that will enter production. The progeny from these matings will offer an impressive phenotype and genotype that will include some extreme curve bending EPDs for both performance and carcass.

You will receive a listing of GE-EPDs on the calf crop to assist in your selection. Don't sleep on this opportunity to acquire some of the most unique maternal genetics available anywhere in the breed.

DVORAK HEREFORDS

30161 387th Ave., Lake Andes, SD 57356
Boyd 605-491-7090
Jeff 605-491-2068

For their inaugural offering in the pen bull show at the National Western, Cane Creek is bringing a set of bulls backed by two of the most prolific, proven donor cows the breed has to offer. When 45C came to the Creek, she had already cemented herself as the "Mother of Herd Bulls". Her exploits are far too numerous to list here, but the sons she's produced are some of the most sought-after genetics in the breed. The three sons featured here live up to her reputation.

First up, the Long Haul son with moderate CE, explosive growth and top carcass is a bull that will supply the sort of power many breeders are hunting for while still moving the needle for carcass merit. He ranks in the top 1% of the breed for 11 traits! Of the 54 45C sons on record, 304L is the #2 Marbling bull. Next are his two Endure half-brothers. Both offer explosive growth with huge REA EPDs. Both brothers over 1.00 for their REA's, 312L is the #1 45C son on record for REA!

Rounding out this pen is 307L, the full brother to Green JCS Makers Mark 229G ET. Out of the Mercedes 11E cow that has produced sale toppers across the land, 307L offers the calving ease package in this pen. Highly maternal, his daughters will be the type with style and eye appeal. Set right in on a set of bulls that are designed to move the needle in almost any breeding program.

With great elation, we're bringing CSC cattle to Denver for the first time! We can't think of any better way to celebrate our NWSS debut than by offering a pick of our bull pen. This set of bulls exemplifies the quality of the CSC program.

Each individual offers a unique skill set designed to round out any breeder's toolbox. Backed by great cow families that are fertile, low maintenance, easy fleshing, eye appealing & income producing cattle. Visit our website to study the herd. Videos will be posted mid-December, and we'll see you in the Yards!

- Out of our top producing brood cow, CSC 701, Hooligan is a full brother to our top selling female this fall, CSC 701 Lady Dew 301 ET, as well as maternal brother to popular AI sire owned with Semex, CSC 701 Bolder 701. He's deep, sound and smooth made: a calving ease bull with all the benefits of LI performance.
- Dehorned.

- This 701 son is Old School Cool, in all the good ways! A power bull that's soft, soggy, flexible, free moving and Homozygous Polled. This guy catches you with his body mass, bone and foot shape, and further appeases with his pigment, red cape and hooded eye. This brute has a wealth of good to offer.

With their first pen of Hereford bulls they've ever exhibited at the National Western, Freking has pulled out all the stops and brought a superior set of young herd sire prospects. Just take a look at the tremendous phenotype in these bulls, all backed with elite quality pedigrees that have purple banners stacked in at each generation. Sired by bulls such as Sancho, the cool made Augustus son, or the Perfecto son from Hoffman Ranch, any of these bulls will produce daughters that will sell for top dollar and compete at the national level.

An elite offering from Canada by top breeders of proven cow families for over 50 years! This is a rare opportunity to pick from the Harvie Ranching Carload before the Harvie Ranching Annual Bull Sale March 12th, 2024 in Olds, AB. This lineup of bulls includes the newly crowned 2023 Canadian Western Agribition National Reserve Champion Bull, Harvie Momentum ET 35L. His full brother, Harvie Thrill Seeker 48L had a successful fall winning banners as well.

This carload is also a representation of some of the top cow families Jill & Cole have in production, with the Firefly cow family at the forefront. Anchored by the Firefly 125Y donor who's posted at nurse ratio 8@106. 125Y has 20 calves registered in Canada in addition to many calves in other countries. Half of these bulls are out of Firefly females with the other bulls represented by other great Harvie cow families, Ms Medonte, Ronda & Marvel.

This lineup of herd sire prospects offers both power bulls & heifer bull options. Take the extra steps, research some of the performance on these dams. Whichever pick out of this carload that's made, the US will feel the impact of the progeny for a long time.

Retaining 1/4 semen interest in the bull selected.

NATIONAL WESTERN Stock Show

PRESENTED BY

CommonSpirit 

2024 LIVESTOCK MAP

A longtime exhibitor in the National Pen Show, Kester Herefords has developed a brand of bringing elite breeding pieces to the National Western. With this year's Pen of 3 Bulls Tyler, Cody and the rest of the family have truly elevated their status as a premier exhibitor in Denver. This pen of ET brothers represents the top of the Kester breeding program and possess the genetic merit that will make an impact.

Study the cow power behind these brothers and you will be even more impressed. His young donor dam is a daughter of the top selling bull in a past Kester sale, Ragnar, that has developed a reputation for outstanding females. Combining him with Screenshot and the immortal 19Z and you have maternal power in the blood. Their sire, Lincoln, has been one of the most exciting young herd sires in recent years. After selling in the 2021 National Sale, his first progeny topped sales across the land last year and continues to be some of the most sought-after genetics in the breed.

Take your pick among this great Pen of Three Bulls. All three possess elite growth and maternal numbers along with breed leading REA EPDs. On top of that, all three are Homozygous Polled. Either way you choose, you will be left with progeny that will be both highly marketable and valuable.

Year after year, Nate is known for bringing some of the very best bulls of any breed to the National Western, and this year's pen of herd sire prospects is no different. A powerful lineup of ET brothers backed by proven cow families has yielded three prospects with major income potential.

Sired by the Supreme Champion Hereford & Champion Horned Bull during the 2020 NWSS, Dominate has gone on to produce multiple top sellers in numerous sales. The dam of these bull is a top seller in the Fall 2023 Simple Choices Sale of Nate's. This Rustic daughter is a full sister to the 2020 JNHE Grand Champion Bred & Owned Heifer and out of the world-famous Strawberry Wine that was the 2014 NWSS Reserve Grand Champion Polled Heifer.

It's hard to find a set of ET brothers that are more royally bred with proven champions than this pen of herd sire prospects. The income potential in the daughters of these bull is nearly limitless.

www.koltcattle.com

Normally for this sale, we count on Tom to bring us a big, stout set of 18-month-old bulls. The problem we had this year is that his Spring yearlings are just too tough to get around! This is without a doubt the best pen of bulls that Tom & his family have ever put together.

Study the data on this pen. They are sired by the top, young AI bulls available in the breed today. The difference here is the date. Study the performance in each of these pedigrees and you'll see the performance that is backing each one of these young herd sires. Be sure to seek this pen out in Denver...it's a set of bulls unlike anything you've seen from K7!

K7 HEREFORDS

The Landgren crew is at it again! Fresh on the heels of their selection at the 2023 NWSS Grand Champion Carload of Bulls, they have another carload of herd sire prospects ready to turn heads in Denver. You've got sires represented from some of the hottest young bulls in the breed such as Lincoln all the way to the proven, maternal powerhouse Belle Air.

All 11 bulls are ET progeny backed by the top donor cows that Mark has become infamous for, such as the dam of the National Champion Bull Land Slinger 2296 1046. We don't have enough room on these pages to list all of the data that makes the maternal power in these bulls so high.

Research these pedigrees ... study your lesson...and pick your next great Herd Sire. You'll be rewarded with progeny that's highly marketable and valuable.

Landgren
RANCH

We are excited to offer you this set of bulls and have had many discussions about which ones to make this trip. In this offering you will find the very first offspring of He Delivers, our pick in the 2022 Upstream Ranch Sale. These sons are the cowman's kind...stout, rugged, dark red and pigmented. The group also offers three sons of the popular herd bull maker, Copper Lady 5101, sired by Final Print, Montgomery & Endure. They offer power, eye appeal, and performance. Another bull is sired by Cadillac and out of our newest donor here at the ranch, Distinction 7134. We feel these bulls will have major impacts on future herds, so do your homework & make your pick. Notice several of these bulls are named after popular drinks, so come by our pen and have a drink of your favorite.

- This donor prospect is about as royally bred as you can make a female, with a pedigree jammed full of National Champions. To begin with, her sire Miles McKee was the world record selling bull for \$600,000 and the 2014 NWSS Grand Champion Bull and Supreme Champion Hereford. His progeny have been some of the most sought after genetics not only for their potential in the showing, but their outstanding maternal abilities.
- The dam of Tanya is one of the most prolific cows in Hereford breed history. She's won the NWSS, raised multiple sale toppers, produced numerous champions and herd sires. She's done it all. There isn't enough room in this catalog, let alone on this page to list all of the champions she has produced. One of her most popular granddaughters, TCC MS Diana 01, has gone on to become a massive producer in her own right. You will be hard pressed to find a National Champion over the past 20 years that hasn't felt the influence of "Harley."
- Due February 10th to the calving ease GKB 8123 Belle Air 1968, Tanya will be ready to begin her donor career this Spring. The revenue produced by her daughters & sons and their future success in the showing makes Tanya the dam of many of the next great ones.

What a way to follow up last year's Grand Champion Pen of Three Females! Bill, Becky, Tom & the crew knew last year would be a tough act to follow, but they knocked it out of the park with this pen. These donor prospects are a great representation of one of the truly unique seedstock operations in the entire country.

To begin with, 3059 is sired by the 2022 NWSS Grand Champion Horned Bull, C 8086 Sancho 1084. Loaded with style & eye appeal, she has a powerful set of growth & carcass numbers wrapped around moderate calving ease. Her highly productive Kahuna dam has posted progeny ratios of 4@106 for WW and 2@104 for YW. Next up is 3021, the daughter of the \$320,000 top selling bull at the 2022 Cattleman's Congress, C GKB Guardian 1015. This is one of the first opportunities to purchase a yearling Guardian daughter. Out of a Belle Air daughter, 3021 ranks in the top 10% of the breed for 10 traits in addition to offering elite marbling.

Third choice in this pen is the Key West daughter, 3069. Key West has proven to be excellent at breeding for calving ease and replacement females. In addition, his carcass value & udder scores makes 3069 a highly maternal donor prospect. Her Milesan dam has been another good producer in New Mexico, posting production ratios of 4@90 for BW and 3@101 for WW. Rounding out this pen is the Belle Air daughter, 3116. What can you say about Belle Air daughters that hasn't already been said a million times? The proof is out there, as many of the top producing females in many cowherds are Belle Air's. This combination with 88X on the bottom side along with her massive growth and marbling EPDs makes 3116 a valuable breeding piece for many years to come.

This pen of donor prospects continues to build on the legacy of one of the best kept secrets in the Hereford breed lies in Stanley, NM.

Bowling Ranch is making their return to the National Western with a pen of maternal sisters that are backed by one of the best females to come from Idaho. C1008 Milky Way 6133 was the top selling female in the 2019 Colyer Herefords Female sale where Nancy bought 1/2 interest in her. A full sister to Eye Candy and Candy Cane, her daughters have gone on to be productive dams for Colyer as well.

These three maternal sisters have the type and kind to be exceptional females, but when you take into account their number profiles they become sure shot donor prospects. First up is the Genesis, Layla 3310. Excellent growth & carcass along side moderate calving ease. Lisa Marie is sired by the 0195 bull that was the sire of the Champion Polled Bull in Reno. This female adds in another great donor female from Colyer, the 4264 Miles daughter. Elite marbling with huge growth in this female.

Laufer is sired by one of the most popular carcass & growth AI sires, 4013. Mating her to some of the elite calving ease bulls today will yield the type of sons & daughters that can lead off auctions in many sales. Rounding out the Bowling pen is Linda, who is out of a Sandhill bred female and sired by one of the young pasture bulls at Bowling Ranch, Gettysburg. Gettysburg was a reserve division winner at the 2021 Cattleman's Congress, and his progeny have been a favorite at Bowling Ranch.

Whichever way you choose, these females from the native prairie in Oklahoma are the kind that will make a huge impact, and will be the dams of many of your top sellers.

All the way from the Upper Peninsula comes a set of excellent brood cow prospects from Bramschreiber Hereford Farms. Paul kept back three of his very best for his first trip to the National Western, and they sure don't disappoint. These girls are a tremendous sampling of what their breeding program is striving to produce. Paul breeds for daughters that are fertile, sound, productive, backed with top genetics all wrapped in an eye appealing package. He always is blending proven & new genetics to stay on the forefront of the breed.

- Rounding out this pen is a Homozygous Polled Blueprint daughter that is awesome profiling & loaded with femininity. Just look at those UDDR & TEAT EPDs to tie in with her BMI & CE. She has all the makings of a highly maternal female with excellent stayability.

BHF 2305 Blue Lady

Bramschreiber Hereford Farms
 Paul Bramschreiber
 Menominee, MI
 906-290-1365 • 906-863-2052

For the first time ever, Eric & Galen are exhibiting a Pen of Heifers at the National Western, & offering choice of them in this sale. Frenzen Polled Herefords runs a low input, survival of the fittest operation with an emphasis on producing bulls for the commercial setting. All four of these heifers were raised by their own dams without creep feed. 3 of them were raised by first calf heifers.

This set of Journey daughters represents the kind of females designed solely for raising commercial sons. You'll be hard pressed to find a set of sisters backed by this much maternal potential and while not extreme, have a well-balanced set of EPDs that will work in any environment. Their genomic numbers will be updated by sale day.

FRENZEN Lady L03

EF Lady L04

EF Flower L36

EF Lady Queen L56

19A | FRENZEN LADY L03

- L56 is a little different pedigree than the first three heifers. She's out of a proven producer at the ranch that is the daughter of a DOD and has posted a nurse ratio of 2@105.

Galen Frenzen Family

50802 N Edgewood Rd., Fullerton, NE 68638

Galen 308-550-0237

Eric 308-550-0238

frenzencattle.com / ggfrenzen@gmail.com

These three heifers represent some of the very best to walk in Carson Valley, NV. These three sisters are out of one of the top producing donor dams at Genoa Livestock, 5047. This MDF 10Y daughter is unmatched in terms of her overall volume, depth, spring of rib and natural fleshing ability. A can't miss producer, she has posted progeny ratios of 9@99 for BW, 7@105 for WW, 6@104 for YW, 27@105 for REA and a rock solid 27 progeny @110 for IMF! 5047 has sons and daughters working in purebred herds from coast to coast, and there will be 12 sons represented in our 2024 annual bull sale.

Genoa is retaining one (1) flush with a minimum of six (6) embryos to be conducted at the seller's expense and the buyer's convenience.

We are really proud to offer you pick of these 5 heifers in a sale of this caliber. They are the kind we strive to produce every day. They have the goods to compete, but most importantly they have the DNA and data behind them to go out and be a front pasture cow. One thing we're especially proud of with these heifers is they are a true representation of our program. They are all natural born calves out of our top producing young cows.

1226 8th Rd., Marysville, KS 66508
Grant & Linda McKay
Grant 308-470-1190

Haxton Hoffman's first time ever exhibiting pen cattle at the NWSS last year earned him the Reserve Champion Pen of 3 Females. This year he makes his return with another great set of May ET sisters that all have futures at the backdrop.

The first heifer is a full sister to last year's Reserve Champion pen and sired by the 2020 NWSS Grand Champion Polled Bull, H The Profit 8426 ET. He was the top seller in the 2019 Hoffman Ranch Bull Sale.

The next two heifers in this pen are sired by H Montgomery 7437 ET. Montgomery was a member of the Hoffman 2018 Grand Champion Carload of Bulls at the National Western along with being named the Reserve Grand Champion Polled Bull later that month at Fort Worth.

The dam of these ET sisters consists of multiple banner winners as well. Their dam was Division 3 Polled Champion at the 2019 JNHE and the maternal granddam won reserve division at both the 2018 NWSS and 2017 JNHE. These three girls are the kind that are going to make May divisions incredibly difficult from coast to coast!

1/5 HOFFMAN
R-A-N-C-H
modern, stout, functional

For the first two years of this event, Jensen Bros. has brought an elite herd sire prospect to sell. This year, Kevin & Sheila are keeping us on our toes by bringing this elite set of production donor prospects. Out of some of the foundation female lines that have formed the bedrock of Kevin & Sheila's success, they are sired by UPS Harvester 9985, widely considered to be one of the best Endure sons in the country. This is the first time a volume of Harvester daughters has been offered for sale. These females all carry elite EPD profiles and represent the future of the Jensen Bros. program as they represent the very best of their replacement females.

Kendi Miigerl and her family are on a roll! In their first trip ever to the NWSS Pen of 3 Heifer Show in 2022, they were selected Grand Champion. Now, just this past fall at the 2023 NAILE, their bull KLM Rollin Harley 107J ET was named Grand Champion Bull! Now for the 2024 NWSS, they're bringing their best set of heifers yet!

The first two full sisters are daughters of and the first opportunity to acquire progeny of that Louisville National Champion, Harley 107J. Double bred Harley, these two are destined to hang banners for whomever shows them. The third choice in this pen is a little different pedigree for KM. This Perfecto daughter is big ribbed, feminine, and bold.

Rounding out this pen is the Platinum heifer and another great show prospect. The dam of the 306L heifer is the dam of the KM Cattle 2022 Champion Pen of 3 Heifers. This Pen of Heifers may be the best the Miigerl family has put together to date and destined for future success.

2024 marks the 82nd year with registered Herefords for Larson Hereford Farm. Data collection has been at the forefront of Fred's breeding philosophy since the 1960's, and this great pen of brood cow prospects is a direct result of that.

Without selecting for any extremes or fads, Fred has focused his matings on producing daughters that raise high performing sons.

They are all three daughters of the 2022 National Western Hereford Sale top selling bull, KJ 7603 Venture 309J ET. Fred purchased him with herd improvement in mind, and the fact that he was backed by an excellent cow, the Validated daughter 7603. Little did Fred know how much demand would be out there for Venture semen. Venture has turned into a top selling AI sire both here in the U.S. as well as New Zealand. These are the type of females that are designed for raising commercial sons in today's beef industry and whichever selection you make, you can't go wrong.

For our first consignment to the Herefords in the Yards Sale, we wanted to bring a true representation of our program. This set of females is exactly what we were hoping for when we found 2047. Raised by our good friends at Innisfail, he combines the carcass merit of 4013 with the stellar 871E female. It's hard to find a more proven pedigree for a herd bull that throws this kind of consistency. All of these heifers were raised by first time mommas and have blown away our expectations. They are stamped with muscle, volume and performance in an eye appealing, cowy package. Not to mention, this is one of the best footed set of heifers we have ever produced. We believe they are the perfect combination of Genotype & Phenotype ... exactly the direction the Hereford breed needs to go. Buy with confidence from one of the oldest, most reputable breeders in the Midwest.

- In 2022, Embryos on Snow offered 1 package of sexed female TCC Ms Diana 01 sired by the record selling \$600,000 C Miles McKee 2103 ET, the multiple-time National Champion and 2014 NWSS Supreme Champion Hereford. With Both Diana and Miles McKee being deceased, a mating like this is impossible to replicate. This dark cherry, extremely conservative marked horned female has "cow power" written all over her. This heifer combines elegance with a perfect amount of true shape, and dimension, not to mention, is as gentle as you can make one.

- In 2018, we were lucky enough to be presented with an opportunity to purchase RV Golden Lady 5064 pregnancies from Fawcett Elm Creek Ranch in South Dakota. Not only have the bulls had an incredible impact on our program, but the females have brought daughters like these to the pasture that make it very difficult for us to let go. Sired by Churchill Big Shot 1136J ET, this polled red eyed heifer gets us pretty excited. Incredibly powerful, extremely sound, square hipped, and beautiful necked, she has the capability to not only collect some backdrops, she will be a donor that will create both bulls and heifers that phenotypically will improve your program. If you like the unique quality that Big Shot 1136J brings to the table, this female is a clone stamp to her sire.

Retaining 3 flushes on the choice of this pen, minimum 6 transferrable embryos

- TCC Ms Diana 01 is one of the most decorated females in the breed and her record of success in the Hereford breed is recognized by many. Producing national champions year after year in the showing, this female has produced some of the most phenotypically unique females in the industry. As a full sister to Lot A, this stunning horned heifer is one that we label as "long term", as she will make an extremely competitive bred. Winning Reserve Champion Female in the Open Show at NILE in Billings, Montana already, this female is the kind that changes a herd. Big legged, sappy middled, but soft enough in her make up this female embodies the type and kind that we can stand behind.

- Another embryo purchase from Embryos on Snow in 2022, we chose the TCC Ms Diana 01 package sired by ECR Who Maker 210 ET. Not only has Who Maker semen commanded between \$1,500-\$2,500 per straw at auction, in 2018, a full sister to this heifer was named Grand Champion at the 2018 NAILE and Reserve at the Royal. This beautifully marked, dark cherry red female will catch your eye the second you walk into the pen. Long bodied, bold middled, great haired, and extremely pretty fronted, we think this heifer is pretty special.

A Commercial Customer-Driven Program!

It is our firm belief, when Breeding Cattle, the "Balanced Trait Approach" is the right one! We want as much performance as we can get while maintaining that "Critical Balance" of calving ease, cowherd and feedlot efficiency and proven carcass value. All the while, never forgetting the "Unmeasured Traits" of structural soundness, udder quality and attachment, mothering ability, vigor at birth, disposition, fertility and longevity.

TAKE ADVANTAGE of using a Hereford bull!

- Heterosis = extra lbs. at weaning
- Improve fertility, feed efficiency and docility in your herd!
- Longevity ...get more years of use from a Hereford bull!
